The Glenwood Balanced Baking Damper is far ahead  
of any other—it is as positive as the turning of a rail-  
road switch—open to start the fire, closed to bake—  
just this one damper for kindling or baking and best  
of all, it can't warp or stick.

The Revolving Coal Grate is easy to shake at all times,  
and simply fine for removing clinkers. It is triangu-  
lar in shape, with three different sides for wear.

The Glenwood Shelf Under Oven Door is not station-  
ary—it automatically raises and lowers as oven door  
is opened or closed. It is always level with oven bot-  
tom—a great convenience when basting meats or re-  
moving food.

Glenwood Iron is smooth and perfect—the easiest of  
any to clean—a real delight to the most exacting  
housekeeper. Get one and you'll be glad ever after.

**YOUR EYES**

In the perfectly normal eye all  
rays of light focus exactly on the  
retina in the back of the eye. From  
there the optic nerve conveys the  
stimulus to the brain and re-  
sults in vision.

The slightest variations in the  
shape of the eyeball affect the fo-  
cus, and to correct it so that all  
rays of light will focus as in the  
normal eye the aid of glasses is re-  
quired.

Our work is to assist your eyes so  
as to give you the vision of normal  
eyes.

and Charlie as usual brought in the five pound limit  
Charlie sure is a good fisherman and good fishermen are  
always particular about their tackle. That's why Charlie  
uses GRISWOLD'S tackle even though with a cut pole,  
a string and a bent pin he could get more trout than most  
of us with real tackle.

GRISWOLD has always been particular to sell  
good tackle and that's why the majority of the best fish-  
ermen here-about make their selections at our shop. Its  
quality first with us regardless of price but we know that  
price also cuts a big figure with you. That's why we  
bought early—to get lower prices—and now we've sacri-  
ficed considerable on profits to keep our selling prices as  
near normal as possible.

SNELLED hooks and leaders are now worth from  
20 per cent to 30 per cent more than we paid a year ago.  
Our prices to you are as before the war—fresh stock too.  
Rods and lines we have had to advance slightly—only  
10 per cent except steel rods. Baskets and some reels  
show a more marked advance but on the whole you'll find  
prices greatly in your favor considering the present market  
values.
